Transitioning into software development with hands-on experience in systems programming, backend development, and web technologies.

Technical Skills

- **Languages:** C, C++, TypeScript, JavaScript, HTML, CSS
- **Frameworks & Tools:** NestJS, Docker, Nginx, PostgreSQL, Git
- **Security:** JWT authentication, 2FA, CSRF protection, SQL injection prevention
- **Spoken Languages:** Japanese (native), English (TOEIC 830 – professional working proficiency)

Projects (42 Tokyo)

→ <https://github.com/shinji-japaaan>

ft_transcendence *(TypeScript, NestJS, React, PostgreSQL, Docker)*
Full-stack multiplayer Pong application built as a team project at 42 Tokyo. Responsible for the security layer: JWT authentication, two-factor authentication, CSRF protection, SQL injection prevention, and WebSocket-based chat functionality.

Inception *(Docker, Nginx)*
Containerized infrastructure built from scratch: Nginx reverse proxy, WordPress, and MariaDB, each in isolated containers configured without pre-built images.

webserv *(C++)*
HTTP/1.1 compliant web server implemented from scratch in C++.

minishell *(C)*
UNIX shell with pipes, redirections, environment variables, and signal handling.

cub3D *(C)*
3D raycasting engine inspired by Wolfenstein 3D.

Education

- **42 Tokyo** – Peer-to-Peer Programming School *(2024 – Present)*
Project-based curriculum: C/C++, algorithms, shell scripting, Git, web fundamentals
- **Aoyama Gakuin University** – B.A., English & American Literature *(Apr 2006 –

Mar 2010)*

Certifications

- TOEIC 830 (Dec 2023)
- CSM – Certified ScrumMaster (Sep 2024)
- SAFe® Agilist (Mar 2025)
